

Core™ Beauty Fulfillment

■ **Core Robotic Picking System** gives you the flexibility to manage high SKU complexity, packaging variability, demand volatility, and labor constraints.

Core keeps beauty fulfillment moving, at scale.

Beauty & personal care brands need automation built for their realities: fast-changing assortments, product launches, seasonal promotions, premium packaging, fragile containers, and shifting order profile channels. Core helps keep fulfillment flowing across cosmetics, skin care, hair care, fragrance, hygiene products, and more.

HANDLES BEAUTY SKU COMPLEXITY AT SPEED

Liquids, creams, oils, and sprays can't be treated like generic hard goods, and come in many formats, including tubes, pumps, droppers, and sachets.

GROWS CAPACITY WITHOUT ADDING LABOR

Scale volume while maximizing workforce productivity, putting robotic picking in place where people do the task today.

WORKS WITHIN YOUR EXISTING WAREHOUSE

Built to support all the workflows you already run, from autobagging to pick-and-pack to tote consolidation for ASRS, and more.

Built to meet the hard demands of your fulfillment operations.

Ready for your SKU mix

Core is engineered to handle broad and difficult SKU assortments, including small, porous, irregular, cylindrical, and heavy items commonly excluded from automation.

Precise pick-and-place execution

Core controls grip, transfer, orientation, and placement to move each item with accuracy, consistency, and product integrity.

Keeps pace with changing assortments

Software-driven adaptability helps Core handle new SKUs and packaging changes in real time without retraining or ramp-up cycles.

Industrial-grade reliability for peak performance

Perception, adaptive gripping, motion planning, rugged hardware, and smart software are integrated into a system built for the toughest fulfillment environments.

Seamless deployment. Guaranteed performance.

- 99+% uptime and accuracy.
- Turnkey integration with your WMS/WES platforms and existing operations.
- Around-the-clock productivity proven in the field for 10+ years.
- 24/7/365 Lifecycle Services that protect performance.
