

Core™ Electronics Fulfillment

■ **Core Robotic Picking System** gives you the flexibility to manage high SKU complexity, demand volatility, and labor constraints where the work happens.

Core keeps electronics fulfillment moving, at scale.

Consumer electronics brands need automation built for their realities: high-value products, fast product launches, short product lifecycles, broad accessory assortments, omnichannel demand, and order profiles that shift by store, customer, device type, and promotion. Core helps reduce manual exception handling and keeps fulfillment flowing.

HANDLES ELECTRONICS SKU COMPLEXITY AT SPEED

Premium consumer electronics require careful handling to protect product condition and prevent packaging blemishes.

GROWS CAPACITY WITHOUT ADDING LABOR

Scale volume while maximizing workforce productivity, putting robotic picking in place where people do the task today.

WORKS WITHIN YOUR EXISTING WAREHOUSE

Built to support all the workflows you already run, from ASRS/GTP workstations to sorter induction to pack-out, and more.

Built to meet the hard demands of your fulfillment operations.

Ready for your SKU mix

Core is engineered to handle broad and difficult SKU assortments, including small, porous, irregular, cylindrical, and heavy items commonly excluded from automation.

Precise pick-and-place execution

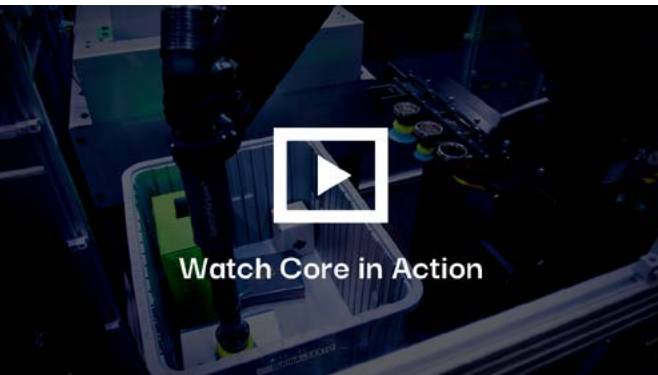

Core controls grip, transfer, orientation, and placement to move each item with accuracy, consistency, and product integrity.

Keeps pace with changing assortments

Software-driven adaptability helps Core handle new SKUs and packaging changes in real time without retraining or ramp-up cycles.

Industrial-grade reliability for peak performance

Perception, adaptive gripping, motion planning, rugged hardware, and smart software are integrated into a system built for the toughest fulfillment environments.

Watch Core in Action

Seamless deployment. Guaranteed performance.

- 99+% uptime and accuracy.
- Turnkey integration with your WMS/WES platforms and existing operations.
- Around-the-clock productivity proven in the field for 10+ years.
- 24/7/365 Lifecycle Services that protect performance.
